
As other great answers here point out, Orwell openly stated that the objective of almost everything he wrote was to reinforce, establish and support a democratic socialist revolution. Both Animal Farm and 1984 are written for people whose whole existence is overwhelmed by the events of Fascism and the second world war. In the books he is warning that even democratic socialism, the option that every decent thinking person would choose, can become a totalitarian idea without having to move through right-wing capitalism and fascism. Industrial Revolution and the Rise of Socialism. As a political ideology, socialism arose largely in response to the economic and social consequences of the Industrial Revolution. As regards the relationship between communists and the democratic/socialists, their class rule would give way to a classless and stateless society, communism. As regards the relationship between communists and the democratic/socialists, their class rule would give way to a classless and stateless society, communism.
