Women in World History: A Biographical Encyclopedia / Anne Commire, Deborah Klezmer / Yorkin Publications, 1999 / 1999

Women in World History: A Biographical Encyclopedia is a 16-volume reference work of biographies of notable women. It includes biographies of around 10,000 women, and also includes genealogical charts of noble families and some joint entries about multiple women (such as "Astronauts: Women in Space"). The work covers women from all walks of life, including all nationalities, and particularly women whose lives are not well documented in other works. "Locating information on women is difficult and the editors have done a fine job assembling and publishing information extant on individual women from many nations both living and dead. Because in some cases only birth, marriage, children, and death dates are known, the 10,000 articles vary in length according to the subject. If you haven't been able to answer reference questions on women, you need this set."--“Outstanding Reference Sources,” American Libraries, May 2001. Includes bibliographical references and indexes.
