The perception that his direct experience with your senses and experiences of various elements have been indirect and images are the product of someone else's mind what others have created and poet in his poems service building is, at this time! These images Frydshshand previously used by someone else, according to the thoughts, it can be concluded that marine images that Persian poets in his poems sometimes have used their personal experiences of the product, in other words the cruises poet. Since all poets have had such an experience, then heard poets and heard stories from other languages such as Astfadhkrdh and your creative mind to work as if they have had such experiences. Poets and writers, the poets also one of the sources they have used in the creation of images. Marine images

A sea of images, images that orbit the center of the sea and its fantasy elements associated with it. Poet in these creations, sea, beach, ship, boat, river, flood, etc. is self-employed in creating themes. Since the classical Persian poets and writers over the river with the sea as was mentioned, related images can also be placed in a row nautical images. It is a clear example of the two rivers can be seen that many times they noted. Rivers "Amu Darya" and "Darya", is still referred to with the same titles.

Following the low usage of literary and nozzle arrays imaginations value in poetry, in the early centuries of maritime images function very limited and almost exclusively to the names and titles that poets sometimes approximate your work suggests that certain conditions beyond the Krdhand.na Alnahr and its remoteness from the sea in the limited order was not unaffected by these applications. Khorasan poets because of its geographical location and away from the sea so did not have direct experience of the use of the images could not be more diverse.

Oxus and Darya and Amu Darya rivers Oxus Rivers, the large ships that drive so much of the time they may have been using sea areas meanings poets and other related issues have created, thanks to the two rivers. However, some poets of this region for trips to remote areas had different reasons cruises experience and the experience left her footprints in their poetry. The presence of marine images of Persian poetry started to experience direct and indirect returns Transoxiana poets, however, mythological stories and images of the sea, maritime and shipping and shipbuilding are present, but the presence is so overwhelming that it's poets their own images. As time passed and on your travels brings to poets, sea broader role played poems, poets, so direct experience in a wide range of images is undeniable. Farokhi and Khaghan poets like Saadi and his works have pointed out the direct experience. Farokhi the conquest of Samnath reference ode to sail on the trip and says:

Vat flow of the sea to come
Kahn was the leader of the People's Bajestan
Breadth of the ship enough for two or three days
Fashion came into the sea twice a day
Fashion Chou open up the fishermen
Were severed entirely from RA hope
There may be water-Kahn hotels
Hemi is a Cho goes hungry by eating chicken
Behind the wheel of water as he tore cast
And they were down the middle beware

(farokhi collection p. 71)

The survey was carried out can be concluded that the images of marine species from the third and fourth centuries during the reign of the Samanids have been initiated then the direct experiences of the poets and the poets of the images, the use of these images has been exceeded. As the poets use of marine images, methods of content creation poets also more diverse and full color images and more journalists have created. However, sometimes in poetry, especially poets, repetitive and stereotyped images and combining the first centuries, but in later periods these images give way to images of very beautiful and amazing imagination that the poetry reaches its climax this beautiful Hindi style.

These changes resulted in some social and political conditions encountered during this period with poetry and poetic images that have significant differences with Khorasani style. A plurality of dynamic images beauty is the worst poetry of this period. The images that the poet help with the use of language, poetic moments in the form of words spilled and give them specific and poetry worthy of admiration regulate create. Poet with this trick, for a term means more and more capacity, such as a word, and uses it for their stated purpose, in the meantime, no matter how we collect and use the poet's words more beautiful he does. Poets in the course of the sea in this way words and some words in a beauty to employ, low capacity of the poet with words that have more than one meaning, full color while creating poetry and writing, to understand his poetry, the reader makes a mental effort.
