
a financial market in which prices are falling. traders, people who deal in shares and bonds. financial analyst, someone who carefully examines the financial state of a company. volatility, sudden and quick change. trading desk, the area of a financial market where a particular company does business. equity, the capital that a company has from shares rather than loans. research analysis. the careful examination of the performance of companies and stocks. Focusing on the world of fashion photography, this book presents an interdisciplinary approach in which this and other aesthetic markets, such as advertising, modelling, art, music and more, can be viewed. The main thrust of this groundbreaking book, is in developing a theory for these cultural markets, characterized by insecurity, and where status and aesthetic diversity generate order and price differentiation. The phenomenological approach From the in-depth study design and interviewee-based results we can jump right into the phenomenological approach, the second important key word in the title of the work.
