El árbol de la ciencia (1911; The Tree of Knowledge), which tells the story of the education of the protagonist, a medical student; it depicts the shortcomings of those teaching medicine, the callousness of many doctors treating Spain's most vulnerable, and the abject poverty and filth in the village where she is born.

His first two books, a collection of short stories, Vidas sombrías (1900; Sombre Lives), and a novel, La casa de Aizgorri (1900; The House of the Aizgorri, 1958), clearly show the direction his later work would take. A confirmed rebel and nonconformist, Baroja wrote at length about vagabonds and people who reflected his own thinking; El árbol de la ciencia (1911; The Tree of Knowledge, 1928) is considered to be basically autobiographical. Wow The Tree of Rebels is a must read. I found this book emotional, gripping and beautiful in places. I enjoyed following Lissie and Ned into the unknown, as they discover a truth that changes their lives forever.
